

Base::DataOutput

```
classDiagram
    class BaseDataOutput["Base::DataOutput"]
    class BaseCsvDataOutput["Base::CsvDataOutput"]
    class BaseCsvFileDataOutput["Base::CsvFileDataOutput"]
    BaseDataOutput <|-- BaseCsvDataOutput
    BaseDataOutput <|-- BaseCsvFileDataOutput
```

A UML class diagram illustrating inheritance. At the top is a dashed box containing the text "Base::DataOutput". Below it are two solid boxes: "Base::CsvDataOutput" in the middle and "Base::CsvFileDataOutput" at the bottom. A vertical arrow points from the top of the "Base::CsvDataOutput" box to the dashed line of the "Base::DataOutput" box. Another vertical arrow points from the top of the "Base::CsvFileDataOutput" box to the bottom of the "Base::CsvDataOutput" box.
